This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false on. 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The sensor used is not color balanced so tonal differences between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are parks, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and features are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the United States Department of Agriculture through the National Agriculture Imagery Program Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS seven-minute geographic quadrangle maps published between 1955 and 1975. Includes principal boundaries, railroads, rivers and streams, and geographic names. River and stream names are from Title 15A of the U.S. Code of Federal Regulations departmental management.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in this series. Visit the CT DEEP website to download the base map digital spatial data shown on this map.

EXPLANATION
Map is not colorfast. Protect from light and moisture. Map prepared by CT DEEP 2013.
