This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf on, 5.79 foot (1 meter) aerial survey taken in the Summer of 2012. The natural color image is not color corrected. This will cause differences in the range and intensity of colors depending on the area viewed.

The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, main rural streets, railroads, and ferry crossings are displayed on the orthophotography. Also shown are airports, hospitals, educational facilities, main streams, and town boundaries. Important geographic locations and place names are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA, Farm Service Agency through the National Agricultural Imagery Program Office in Park Ridge, IL.

BASE MAP DATA - Based on data originally from the 1:24,000 scale U.S. Geological Survey quadrangle maps published between 1980 and 1992. Includes parcel boundaries, railroads, airports, geographic names and geographic places. Railroad and parcel names are from Title 43, U.S.C. copyrighted data. These map publications provide access to government owned information.
