This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.79-foot (1 meter) aerial survey taken in the Summer of 2012. The statewide mosaic is not color balanced so tonal imbalances between individual input image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match the locations of such features on the orthophotography. Also shown are airports, geographic names and geographic places. Streets and street names are from Tele Atlas ® data. Check with local government or local source for current information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, geographic facilities, train stations, and town boundaries.

**DATA SOURCES**

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the National Agricultural Imagery Program Office in Salt Lake City.

BASE MAP DATA - Based on data originally from, 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, geographic names and geographic places. Streets and street names are from Tele Atlas ® copyrighted data. These map information is neither current nor complete.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT ECO website for this map and a variety of others in raster format.

**EXPLANATION**

This map is not colorfast and is not waterproof. Protect from light and moisture. Map prepared by CT DEEP, January 2013.
