This map displays 2012 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false on, 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The states on image is not color balanced so tonal imbalances between individual input image is not corrected. This will create differences in the true and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed and may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, mass transit, and town boundaries. Important geographic locations and terrains are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP) is provided by the US Department of Agriculture, National Agricultural Imagery Program, via the Aerial Photography Field Office in Salt Lake City. ORTHOPHOTOGRAPHY - National Agricultural Imagery Program, (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from the 1:12,000 scale U.S.G.S. topographic quadrangle maps published between 1950 and 1980. It includes political boundaries, water, roads, and major features are from the Title 43: “Revised Statistical Atlas” copyrighted data. Major railroads are from Amtrak and map displays names within certain area.
