This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a true color, pan-sharpen, 5.79-foot (1 meter) aerial survey taken in the Summer of 2012. The statewide mosaic is not colorbalanced so tonal imbalances between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed at may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the National Photographic Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from the 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, geographic names and geographic places. River and town names are from NTL Atlas.© copyrighted data from the map information within associated symbols.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others available for download. Visit the CT DEEP website to download the free map digital spatial data shown on this map.
