This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false color, 2.59-foot (1 meter) aerial survey taken in the Summer of 2012. The resulting imagery is not color
balanced so true intensities between individual input images is not corrected. This will cause differences in the range and
intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match
information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times.
Street-level data such as major interstates, US routes, state routes, streets, culverts, and ferry crossings are displayed but
may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational
facilities, main streets, and town boundaries. Important geographic locations and waterbodies are labeled.

**DATA SOURCES**

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the
USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:12,000 scale USGS 7.5-minute topographic
geographic maps published between 1970 and 1990. It includes political boundaries, waterbodies,
infrastructure, buildings, and geographic features. River and road names are from Title 43, "Map and
Remote Sensing Data Base Mapping Information, Waterbody Data" Geographic Names Information System Geographic Names
Information System.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in
the ECO series. Visit the CT DEEP website to download the free esri digital ortho base shown on this
map.
