This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.79 foot (1 meter) aerial survey taken in the Summer of 2012. The natural color is not color balanced so tonal variations between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as street names, US routes, state routes, streets, railroads, and ferry crossings are displayed as may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and boundaries are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangles, city and town data, airports, geographic names and geographical objects. Street and trail names are from TLC Atlas® copyrighted data. Street map information is updated incrementally.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of other data in PDF format. Visit the CT DEP website to download the free map digital data files shown on this map.
