This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false on, 5.99-foot (1 meter) aerial survey taken in the Summer of 2012. The谩srm谩s image is not color balanced so tonal differences between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street-level data such as major interstates, US routes, main streets, avenues, and railroads are displayed, but may not match the location of such features on the orthophotography. Also shown are hospitals, educational facilities, train stations, and some boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA: Based on data originally from 1:12,000-scale USGS 7.5-minute topographic quadrangle maps published between 1969 and 1992. It includes public land boundaries, railroads, airports, geographic names and geographic places. River and stream names are from Title 48 A. Copyrighted data were map information added as permission granted
MAPS AND DIGITAL DATA: Visit the CT DEP website to download the base map digital orthophoto data with this map.
