This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a pseudocolor, false color, 5.79-foot (1 meter) aerial survey taken in the Summer of 2012. The pseudocolor treatment is not color balanced so tonal differences between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, main streets, rivers, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographical locations and landmarks are labeled.

**DATA SOURCES**

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA, Federal Service Agency through the NAIP Photography Field Office in Bell Labs GmbH. BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5-minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, waterbodies, roadways, airports, and geographic names. Street and street names are from Title III/4, copyright 1999. Other map information is from commonly available sources.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT ECO website for this map and a variety of others in PDF format. This map was prepared by the Connecticut DEP January 2013.
