This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false on, 5.79 foot (1 meter) aerial survey taken in the Summer of 2012. The orthophoto mosaic is not color balanced so tonal imbalances between individual input image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, major streets, street names, and geographic places. Basic and major roads are from Title 23 Atlas® copyrighted 1996. Other map information includes manmade and natural water.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
