This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 0.519 foot (1 meter) aerial survey taken in the Summer of 2012. The statewide mosaic is not color balanced so tonal imbalances between individual input image is not corrected. This will cause differences in the image and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match important geographic locations and waterbodies are labeled. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and boundaries are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1989 and 1992. It includes political boundaries, railroads, airports, geographic names and geographic places. Basic and aerial survey data are from Title 43 AR mycrodata ourclip database. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and boundaries are labeled.

MAPS AND DIGITAL DATA - From the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown in this map.
