This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 0.60 foot (1 meter) aerial survey taken in the Summer of 2012. The surrounding area is not color balanced so tonal imbalances between individual input image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state names, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and transects are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP) is provided by the USGS/Forest Service Agency through the National Photography Field Office in South Hadley, MA.

BASE MAP DATA: Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroad, airports, geographic names and geographic places. Based and https names are from USGS/Adams Topographic Database. These are not map locations and are not cross referenced entries.
