This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false on, 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The monochrome mosaic is not color balanced so tonal imbalances between individual input images are not corrected. This will mean differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street-level data such as major interstates, US routes, main streets, avenues, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, main streets, and town boundaries. Important geographic locations and text blocks are labeled.

EXPLANATION

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the NAIP Photography Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from the 1:12,000 scale USGS 7.5 minute topographic quadrangle maps published beginning from 1949. Each 7.5 minute quadrangle boundary, roads, river, geographic names and geographic place names, Blight, and real names are from TopoTools® orthophotography and these map determinations within associated cartography.

MAPS AND DIGITAL DATA - Visit the CT DEEP website for the map and a variety of others in this format. Visit the CT DEEP website to download the free map digital ortho-base data on this map.
