EXPLANATION

This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false color, 5.79-foot (1 meter) aerial survey taken in the summer of 2012. The resulting imagery is not color balanced so tonal imbalances between individual input images are not corrected. This will cause differences in the tone and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and features are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) information provided by the USGS Farm Service Agency through the National Agricultural Imagery Program Office in Salt Lake City.

BASE MAP DATA - Base on data originally from the USGS 7.5 minute topographic quadrangle maps published between 1990 and 2010. Includes political boundaries, railroads, roads, highways, rivers, lakes, and geographic names. Discoloration and other map information is subject to change over time.

MAPS AND DIGITAL DATA - Visit the CT DEP website to download the base map digital spatial data shown on this map.
