2012 Color Orthophoto
Mansfield, CT
(Southwest)

EXPLANATION
This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a corrected color, 3.77 feet (1 meter) aerial survey taken in the Summer of 2012. The on-screen differences in the image and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed on this map. Names of roads and features are not colorfast and their appearance may differ from their actual color.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) imaged by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:24,000 scale U.S. Geological Survey quadrangle maps published in the 1990s and 2000s. Includes all road names; railroads, airways, county boundaries, and state boundaries. Imagery and feature names are from Title 43, Federal Regulations (GPO). Imagery is not colorfast and may appear different at different times.

MAPS AND DIGITAL DATA - Visit the CT DEEP website for this map and a variety of others in PDF format. Visit the CT DEEP website to download the base map digital spatial data shown on this map.

Important geographic locations and waterbodies are labeled. Educational facilities, train stations, and town boundaries. Routes, streets, railroads, and ferry crossings are displayed yet are not colorfast. The location and shape of features in other GIS layers will not exactly match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic features and towns are labeled.
