This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.79-foot (1 meter) aerial survey taken in the Summer of 2012. The new and recent image is not color balanced. The color variations can be controlled to some extent depending on the area viewed. This will mean differences in the range and intensity of colors depending on the area viewed. The locations of such geographic features shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed, may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the NAIP Program office in Salt Lake City.
BASE MAP DATA - Based on 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, and ferry crossings are displayed on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

EXPLANATION
Information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed. This will mean differences in the range and intensity of colors depending on the area viewed. The locations of such geographic features shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed.

Important geographic locations and waterbodies are labeled.

MAPS AND DIGITAL DATA - Visit the CT DEP website to download the base map digital spatial data shown on this map. The map is not colorfast and may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.
