This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotographs for the State of Connecticut. It is a normal color, false color, 5.79 foot (1 meter) aerial survey taken in the Summer of 2012. The orthophotograph is not color balanced so tonal imbalances between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street level data such as major interstates, US routes, state routes, streets, culverts, and ferry crossings are displayed unless the data was not used or may not match the locations of such features on the orthophotograph. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and features are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), as provided by the USGS, with assistance from the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from 1:15,000 scale USGS topographic quadrangle maps published between 1969 and 1992. Includes cultural boundaries, railroads, airports, geographic names and geographic places. Street and trail names are from Title 23 AADT86 orthophotograph data. Base map produced in multiple image segments.
