This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false on, 3.39 feet (1 meter) aerial survey taken in the Summer of 2012. This orthophoto is not color balanced so tonal imbalances between individual input image may not match the locations of such features on the orthophotography. Also shown are airports, landmarks, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the United States Department of Agriculture through the Natural Resources Conservation Service (NRCS) Office of Geographic Information. For information visit https://nrcs.usda.gov/wps/portal/nrcs/main/national/soils/data/imagery/.
BASE MAP DATA - Based on data originally from 1:12500 scale USGS 7.5 minute topographic quadrangle maps published between 1980 and 1995. A statewide grid based on latitude and longitude at 200-foot intervals was used to display data. The data was updated in 2010.
MAPS AND DIGITAL DATA - Visit the CT DEEP website for this map and a variety of others in PDF format. Visit the CT ECO website for this map and a variety of others in digital data format.

EXPLANATION
Information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major arteries, US routes, state routes, streets, railways, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, landmarks, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.
