This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.79-foot (1 meter) aerial survey taken in the Summer of 2012. The aerial image is not color balanced so total imbalances between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major intersections, US routes, main roads, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are areas, hospitals, educational facilities, main streams, and town boundaries. Important geographic locations and transects are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP) is provided by the USGS of Farm Service Agency through the National Agricultural Imagery Program Office in Rockville, MD.
BASE MAP DATA: Based on data originally from 1:24,000 scale USGS 7.5-minute topographic quadrangle maps published between 1932 and 1979. It includes political boundaries, railroads, roads and label names are from Title 23, AEC, transportation data. Map data information includes construction category.
MAP AND DIGITAL DATA: Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
