This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a digital color, fade-on, .579 foot (1 meter) aerial survey taken in the Summer of 2012. The summer-time image is not color balanced so visual indications between individual input images is not consistent. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railways, and ferry access are displayed at may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, main streets, and town boundaries. Important geographic locations and townships are indicated.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA Forest Service Agency through its aerial photography field office in Salt Lake City.

BASE MAP DATA - Based on data originally from 1:12,000 scale USGS 7.5 minute topographic quadrangle maps published before 2008 and 2009. Includes national boundaries, cultural extent, geographic names and geographic feature. Base and base layer names are from Title 16, Geographic Names Information System Maintenance, U.S. Department of the Interior, Bureau of Land Management.

MAPS AND DIGITAL DATA - Visit the CT DNR website for the map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital orthophoto data shown on this map.
