This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a neutral color, false color, 0.599 feet (1 meter) aerial survey taken in the summer of 2012. The statewide mosaic is not color balanced so true values between individual input images are not convolved. This may cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, main streets, stores, railroads, and ferry routes are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, main waterways, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) orthophotography provided by the USGS on behalf of the Agency through the NAIP Ortho Photo Field Office on behalf of USDA.

BASE MAP DATA - Based on data originally from the 1-5,000 scale USGS 7.5-minute topographic quadrangle maps published between 1967 and 1980. Includes political boundaries, railroads, airports, geographic names and geographic places. Roads and town names are from Title 13ACT.

MAPS AND DOWLOAD DATA - Visit the CTDEP website for the map and a variety of others in PDF format. Visit the CT DEP website to download the free map digital ortho photography data on this map.

EXPLANATION
