This map displays 2012 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false on, 3.39 feet (1 meter) aerial survey taken in the Summer of 2012. The aerial imagery is not color-balanced so tonal imbalances between individuals input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street-level data such as major interstates, U.S. routes, state routes, streets, railroad, and ferry routes are displayed as may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, main systems, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), as provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - Based on data originally from 1:10,000 scale USGS maps copyrighted by the U.S. Geological Survey and, for roads, for roads and county names are from Title 43, U.S.C. copyright by the U.S. government. Shown in map information is not referenced original container:
