This map displays 2012 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, 1:5,000 scale (3 meter) aerial survey taken in the Summer of 2012. This statewide mosaic is not color balanced so visual attributes between individual input images are not corrected. This will cause differences in the shade and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection times. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed so they may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and transportation are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the United States Farm Service Agency through the National Agricultural Imagery Program Office in Salt Lake City, Utah.
BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, major interstates, US routes, state routes, lakes, and rivers.
GEOGRAPHIC FEATURES - Includes political boundaries, railroads, major interstates, US routes, state routes, lakes, and rivers.
EDUCATIONAL FACILITIES - Includes private and public educational institutions.
TRAIN STATIONS - Includes train stations.
TOWN BOUNDARIES - Includes city and town boundaries.
