This map displays 2012 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false on 5.79 feet (1 meter) aerial survey taken in the Summer of 2012. The aerial photo is not color balanced so tonal differences between individual input images are not corrected. This will cause differences in the image and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotograph. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), provided by the USDA’s Farm Service Agency through the National Agricultural Imagery Program Office in Arlington, VA.
BASE MAP DATA - Based on data originally from 1:12,000 scale USGS 7.5 minute topographic quadrangle maps published between 1990 and 1995. Includes principal boundaries, roads, railroads, airports, geographic names and geographic places. Residential and street names are from Title 43, U.S.C. copyright data. These map symbols are accurate within a quarter mile.
MAPS AND DIGITAL DATA - Visit the CT DEEP website for the map and a variety of others in PDF format. Visit the CT DEEP website to download the base map digital spatial data from the map.
