EXPLANATION

This map displays 2012 National Agriculture Imagery Program (NAIP) color infrared orthophotography for the State of Connecticut. It is color infrared, 3.39 feet (1 meter) aerial survey taken during the summer of 2012. This color infrared orthophotography provides mosaic services, such as observing crop and vegetation condition as well as supporting identification and mapping of habitat areas. The orthophotography is not colorfast; differences in spatial accuracy and data collection dates. Street-level changes are not captured due to differences in spatial accuracy and data collection dates. Street-level changes are not captured due to differences in spatial accuracy and data collection dates. See the orthophotography for the location of new streets or major roads.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.
