2012 Color Infrared Orthophoto
North Canaan, CT

EXPLANATION
This map displays 2012 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, false col 3.39 feet (1 meter) aerial survey taken during the summer of 2012. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The statewide color infrared orthophotography product is maintained by the USDA-NAIP in cooperation with the U.S. Geological Survey and is produced from classified aerial imagery. The orthophotography is color infrared, and the intensity of colors depending on the area viewed. The location mosaic is not color balanced so tonal imbalances between individual services, such as observing crop and vegetation conditions as well as differences in spatial accuracy and data collection dates. Street-level information shown in the aerial photography primarily due to and shape of features in other GIS layers will not exactly match the differences in spatial accuracy and data collection dates. Street-level data such as major universities, U.S. routes, state routes, streets, railroad, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA-NAIP in cooperation with the U.S. Geological Survey and is produced from classified aerial imagery.
BASE MAP DATA - Based on data originally from 1:24,000-scale USGS 7.5-minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, geographic names and geographic places. Rivers and streets names are from State Route and ferry crossings are displayed. The locations of major highways, railroads, and airports, hospitals, educational facilities, train stations, and towns are shown. Important geographic locations and waterbodies are labeled.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT ECO website for this map and a variety of others in PDF format. To download the base map digital spatial data shown on this map.
