EXPLANATION

This map displays 2012 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 foot (1 meter) aerial survey taken during the summer of 2012. This aerial orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The statewide digital orthophotography tile base map is created by USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

Some data in the derived thematic layers may have been obtained from various sources. The resolution, accuracy, and completeness of these data vary. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Minor-level data such as major interstates, US routes, state routes, streets, railways, and utility crossings are displayed but may not match the locations of such features on the orthophotography. Also, shown are airports, geographic names and geographic places. Streets and street names are from Tele Atlas ® quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, and ferry crossings are displayed but may not match the data such as major interstates, US routes, state routes, streets, railways, and utility crossings are displayed but may not match the locations of such features on the orthophotography. Also, shown are airports, geographic names and geographic places. Streets and street names are from Tele Atlas ® quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, and ferry crossings as well as some railroads and ferry crossings as well.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

ROAD MAP DATA - Based on data originally from a 1:24,000 scale USGS 7.5 minute topographic quadrangle map published between 1990 and 2000. It includes political boundaries, railroads, airports, geographic names and geographic places. Streets and street names are from Tele Atlas ® quadrangle maps published between 1969 and 1992. All other data are not copyrighted.

MAP AND CARTOGRAPHY - This map is courtesy of the CT DEEP. It is not to scale and should not be used for legal purposes.
