This map displays 2012 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken during the Summer of 2012. This infrared orthophotography provides state services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. The statewide infrared orthophotography for the State of Connecticut. It is a 2012 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken during the Summer of 2012. This infrared orthophotography provides state services, such as observing crop and vegetation conditions as well as supporting identification and mapping of habitat areas. DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - Based on data originally from 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, and ferry crossings are displayed but may not match the data such as major interstates, US routes, state routes, streets, airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.
