This map displays 2012 National Agriculture Imagery Program (NAIP) aerial orthophotography for the State of Connecticut. It is a color infrared, false color, 3.79 foot (1 meter) aerial survey taken during the summer of 2012. This colored orthophotography provides many services, such as observing crop and vegetation condition as well as supporting infrastructure and mapping of habitat area. The statewide mosaic is generated from the input images and is color balanced so that tonal imbalances between individual images are not apparent. Differences in spatial accuracy and data collection dates, small-level data such as water features, US routes, state routes, streets, railroads, and ferry crossings are displayed, but may not match the locations of such features on the orthophotography. Also shown are hospitals, educational facilities, town names, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the Applied Photographic Inc (AP Inc) and Lathrop CT.
BASE MAP DATA: Based on data originally from 1:148,000 scale USDA 7.5 minute topographic quadrangle maps published between 1950 and 2012. It includes political boundaries, highways, railroads, water features, geographic names, and geographic places. Rivers and street names are from State ARC’s copyrighted. This 7.5 minute mosaic contains other sources and may not be complete.

MAPS AND CARTOGRAPHY: This is an interactive web-based interface that was developed by the University of Connecticut and the CT DEP.
