This map displays 2012 high-resolution orthophotography for the Town of Haddam. It is in a natural color, leaf-off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (DEEP), the Connecticut Department of Transportation (CDOT), and the United States Geological Survey (USGS) providing support through project management, contracting, and quality assurance, and geographic control (QAGC).

BASE MAP DATA: Based on data originally from a 1:20,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1989. Attributes such as buildings, railroads, airports, geographic names and geographic places, rivers and other waterbody icons from 1992 USDA copyrighted data. Base map information in another current source complete.

MAP and DIGITAL DATA: Visit the CT DEEP website for this map and a variety of others on PDF formats. Visit the CT DEP website to download the free map digital special data layers on this map.
