This map displays 2012 high resolution orthophotography for the State of Connecticut. It is a natural color, leaf-off, 1-foot (30.5-millimeter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not match the corresponding feature on the orthophotography. Also shown are airports, educational facilities, town boundaries, and street names. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Aerial imagery is provided through partnerships between the Connecticut Department of Emergency Services and Public Protection (DESP), the Connecticut Department of Transportation (CDOT), and the National Oceanic and Atmospheric Agency (NOAA) through the Joint Information System (JIS). Also included are the National Agriculture Imagery Program (NAIP) and the National Aeronautics and Space Administration (NASA) Aerial Photography Program (APP) leaf-off Imagery.

BASE MAP DATA - Based on data originally from the 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, geographic names and geographic places. Streets and street names are from Tele Atlas® copyrighted data. These map information is not intended for navigation.
