This map displays 2012 high-resolution orthophotography for the State of Connecticut. It is a natural color, leaf off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed and may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial Imagery is provided through partnership between Connecticut Department of Emergency Services and Public Protection (CT DEEP), the Connecticut Department of Transportation (CDOT), and the National Oceanic and Atmospheric Agency (NOAA). Also provided through cooperation with the United States Geological Survey (USGS) and the U.S. Department of Defense (DoD). It includes political boundaries, railroads, airports, geographic names and geographic places. Roads and street names are from FPOW© "orthophoto" data. Since this map information is neither current nor complete, users should verify information with the most current data available from the State of Connecticut.
