EXPLANATION

This map displays 2012 high resolution aerial orthophotography for the State of Connecticut. It is a natural color, leaf off 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other DHS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, US routes, state routes, county roads, railroads, and utility crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Aerial imagery is provided through partnerships between Connecticut Department of Emergency Services and Public Protection (DESPP), the Connecticut Department of Transportation (CDOT), and the National Geospatial-Intelligence Agency (NGA), along with the United States Geological Survey (USGS) providing support through project management, contracting, and quality assurance/quality control (QA/QC).

BASE MAP DATA: Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1984 and 1992. It includes political boundaries, railroads, airports, geographic names, and geographic places. Water and road names are from Esri Arc® publicly licensed data. Base map information is neither current nor complete.

INTERNET ACCESS: Visit the CTDEP website to download the base map digital spatial data shown on this map.
