This map displays 2012 high resolution orthophotography for the State of Connecticut. It is a natural color, leaf off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, US routes, state routes, streets, railways, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, town stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (DEEP), the Connecticut Department of Transportation (DOT), and the National Oceanic and Atmospheric Agency (NOAA) along with the United States Geological Survey (USGS) providing support through project management, collecting and quality assurance/quality control (QA/QC).

HARD MAP DATA: - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1980 it includes political boundaries, roads, water, geographic names and post office names. Roads and other names are from 1:50,000, copyrighted data. Some map information is in another current use complete.

Map made using ESRI, Inc. "Map the CT DEEP website for the area and a variety of others on PDF format. Visit the CT DEEP website to download the base map digital spatial data shown on this map.
