This map displays 2012 high resolution orthoimagery for the Town of Darien. It is a natural color, leaf off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, 1/2 mile, state route, county, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthoimagery. Also shown are airports, hospitals, educational facilities, town stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through partnerships between Connecticut Department of Emergency Services and Public Protection (DESPP), the Connecticut Department of Transportation (CDOT), and the National Geospatial Intelligence Agency (NGA), along with the United States Geological Survey (USGS) providing support through project management, contracting and quality assurance/quality control (QA/QC).

HARD MAP DATA: Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1998. It includes political boundaries, waterbodies, geographic names and geographic places. Roads and other man made features are from this ArcInfo® copyrighted data. These map information is in another current version complete.

BASE MAP DATA: Map the CT DEP website for the topographic and a variety of others on PDF Format. Visit the CT DEP website to download the free map digital special data shown on this map.
