EXPLANATION

This map displays 2012 high resolution orthophotography for the State of Connecticut. It is a natural color, leaf off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and towns boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (CT DEEP), the Connecticut Department of Transportation (CDOT), and the National Geological Survey Agency (NGSA) along with the United States Geological Survey (USGS) providing support through project management, contracting and quality assurance and quality control (QAQC).

BASE MAP DATA: Based on data acquired from 1:24,000 scale USGS 7.5 minute topographic maps published between 1979 and 1986. It includes political boundaries, railroads, major geographic names and geographic places. Water and coast names are from Blue Atlas® copyrighted data. These map information is another current not complete.

WEB AND DIGITAL DATA: Map the CT DEEP website for the map and a variety of others or PDF format. Visit the CT DEEP website to download the base map digital spatial data shown in this map.
