EXPLANATION

This map displays 2012 high-resolution orthophotography for the State of Connecticut. It is a natural color, leaf off, 1 foot (30 cm) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street level data such as major intersections, US routes, state routes, airports, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Aerial imagery is provided through a partnership between the Connecticut Department of Emergency Services and Public Protection (DEEP), the Connecticut Department of Transportation (CDOT), and the National Oceanic and Atmospheric Agency (NOAA).

BASE MAP DATA - Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, geographic names and geographic places. Blue and their names are from 1983. Modern versions of the USGS, copyright all data. These map information is another current user complete.

MAP AND DIGITAL DATA - Map data from CTDEP website or the map and a variety of others in PDF format. Visit the CTDEP website to download the five maps digital data, later than this map.
