EXPLANATION

This map displays 2012 high-resolution orthophotography for the State of Connecticut. It is a natural color, leaf-off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. This location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major names, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and landmarks are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through partnership between Connecticut Department of Emergency Services and Public Protection (DESPP), the Connecticut Department of Transportation (CDOT), and the National Geospatial Intelligence Agency (NGA), along with the United States Geological Survey (USGS) providing support through project management, contracting, and quality assurance/quality control (QA/QC).

BASE MAP DATA: Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1975. It includes civil boundaries, railroads, airports, geographic names and geographic places. These and other names are from USGS copyrighted data. More map information in another current use complete.

BASE AND DIGITAL DATA: Map the CT EER® ArcView for the data and a variety of others in PDF format. Visit the CT EER® website to download the free map digital special data format on this map.
