This map displays 2012 high resolution orthophotography for the Region of Connecticut. It is a natural color, leaf off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street level data such as major intersections, 20 meters, state routes, streams, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

**DATA SOURCES**

Orthophotography: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (DEEP), the Connecticut Department of Transportation (DOT), and the National Oceanic and Atmospheric Agency (NOAA) along with the United States Geological Survey (USGS) providing support through project management, reviewing and quality assurance/quality control (QA/QC).

Base Map Data: Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1985. In addition, political boundaries, waterbodies, airports, geographic names and geographic place names, streets and their names are from the AirLine™ copyrighted data. Since map information is another current use complete.

**EXPLANATION**

This map is not colorfast. Protect from light and moisture. Map prepared by CT DEEP February 2013.
