EXPLANATION

This map displays 2012 high-resolution orthophotography for the State of Connecticut. It is a natural color, leaf-off, 1 foot (0.30 meter) aerial imagery taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street, land, water, and other features in the GIS are displayed in the orthophotography. Also shown are airports, hospitals, educational facilities, town boundaries, and other geographic features not visible in the orthophotography. Important geographic information is overlaid.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (CT DEP), the Connecticut Department of Transportation (CT DOT), and the National Oceanic and Atmospheric Administration (NOAA) along with the United States Geological Survey (USGS) providing support through project management, contracting and quality assurance/quality control (QA/QC).

BASE MAP DATA: Based on data originally from 1:24,000 scale U.S.G.S. 7.5 minute topographic quadrangle maps published between 1979 and 2009, 1:12,000 scale DEMs from the National Elevation Dataset (NED) and 1992-2009 orthoimagery. Orthoimagery data for this map is “copyrighted data.” Since map information in another current data source.
