2012 Color Orthophoto Leaf-Off
Seymour, CT

EXPLANATION
This map displays 2012 high resolution orthophotography for the State of Connecticut. It is a natural color, leaf off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street level data such as major intersections, US routes, state routes, streets, railways, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, town stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: Aerial imagery is provided through partnership between Connecticut Department of Emergency Services and Public Protection (DEEP), the Connecticut Department of Transportation (CDOT), and the National Oceanic and Atmospheric Administration (NOAA), along with the United States Geological Survey (USGS) providing support through project management, contracting and quality assurance/quality control (QA/QC).

HARD MAP LAYERS: Based on data originally from 1:24,000 scale USGS 7 1/2 minute topographic quadrangle maps published between 1992 and 1996. It includes public transportation, schools, county, geographic names and geographic places. Streets and road names are from MapInfo® copyrighted data. Since map information is not current not exact complete.
