2012 Color Orthophoto
Leaf-Off
Cornwall, CT
(South)

EXPLANATION
This map displays 2012 high-resolution orthophotography for the State of Connecticut. It is a natural-color, leaf-off, 1-foot (0.30 meter) aerial survey taken in the Spring of 2012. This layer is not exact and will not match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, minor roads, railways, and ferry crossings are displayed yet may not match the boundaries of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (DEEP), the Connecticut Department of Transportation (CDOT), and the National Aeronautics and Space Administration (NASA), along with the United States Geological Survey (USGS) providing support through project management, contracting and quality assurance/quality control (QA/QC).

BASE MAP DATA: Based on data originally from 1:24,000 scale USGS 7.5-minute topographic quadrangle maps published between 1967 and 1992. It includes political boundaries, railroads, airports, geographic names, and geographic places. Roads and their names are from the 1989-92 USGS 7.5-minute topographic data. These map images in another current use complete.
