2012 Color Orthophoto
Leaf-Off
Sherman, CT
(South)

EXPLANATION
This map displays 2012 high resolution orthophotography for the State of Connecticut. It is a natural color, leaf-off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, city streets, state streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (DESPP), the Connecticut Department of Transportation (CDOT), and the National Geospatial-Intelligence Agency (NGA) along with the United States Geological Survey (USGS) providing support through project management, collecting and quality control/quality control (QC/QC).

BASE MAP LAYERS: Based on data originally from 1:24,000 scale (7.5 minute topographic quadrangle maps published between 1969 and 1992) including political boundaries, railroads, airports, geographic names and geographic places. Rivers and flood zones are from Flood Insurance Rate Maps (FIRM) copyrighted data. These map information is in another current use complete.

MAP AND DIGITAL DATA: Visit the CT GIS website for the map and a variety of others on PDF format. Visit the CT EDD website to download the base map digital spatial data shown on this map.
