EXPLANATION

This map displays 2012 high resolution orthophotography for the State of Connecticut. It is a natural color, leaf off, 1 foot (30 cm) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and transfixedes are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (CDSP), the Connecticut Department of Transportation (CDOT), and the National Oceanic and Atmospheric Agency (NOAA) along with the United States Geological Survey (USGS) providing support through project management, contracting and quality data management ensuring (QMD).

BASE MAP DATA: Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1967 and 1989 and updated through hand-digitization, including major geographic features and geographic place names. Roads and other names are from the "A" copyrighted data. These map information is in another current use complete.

MAPS AND DIGITAL DATA: Maps of the CT 460 Digital Orthophoto and a variety of others on PDF format. Visit the CDSP website to download these maps digital special data related to this map.
