This map displays 2012 high resolution orthophotography for the State of Connecticut. It is a natural color, leaf off, 1 foot (0.30 meter) aerial imagery taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, railroads, and ferry crossings are displayed yet not labeled. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (DESPP), the Connecticut Department of Transportation (CDOT), and the National Geospatial Intelligence Agency (NGA) along with the United States Geological Survey (USGS) providing support through project management, contracting, and quality assurance/quality control (QA/QC).

HARD MAP DATA: Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1970 and 1990 & includes political boundaries, waterbodies, geographic names and geographic places. Roads and road names are from 1990 USGS aerial photography data. More map information in another current one complete.
