2012 Color Orthophoto
Leaf-Off
Barkhamsted, CT
(West)

EXPLANATION
This map displays 2012 high-resolution orthophotography for the State of Connecticut. It is a natural color, leaf-off 1 foot (30 cm) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street level data such as major intersections, U.S. routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, town stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: Aerial imagery is provided through partnership between Connecticut Department of Emergency Services and Public Protection (CTDPS), the Connecticut Department of Transportation (CDOT), and the National Oceanic and Atmospheric Agency (NOAA) along with the United States Geological Survey (USGS) providing support through project management, coordinating and quality assurance/quality control (QA/QC).

MIXED MAP DATA: Based on data captured from 1:23,000 scale USGS 7.5 minute topographic quadrangle maps published between 1967 and 1986. It includes political boundaries, roads, airports, geographic names, and geographic places. These road and place names are from USGS 1:24,000 topographic data. Since map information is as is, current use is incomplete.

MAPPING AND PRINTING: CartoData CT(E®) software for the design and a variety of other on-PDF tools. Visit the CTDPS website to download the free map digital special data drives on this map.
