2012 Color Orthophoto
Leaf-Off
Coventry, CT
(West)

EXPLANATION
This map displays 2012 high resolution orthophotography for the State of Connecticut. It is a natural color, leaf-off, 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street level data such as major intersections, TV towers, state routes, squares, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and landmarks are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through partnerships between Connecticut Department of Emergency Services and Public Protection (DESP), the Connecticut Department of Transportation (CDOT), and the National Geospatial Intelligence Agency (NGA), along with the United States Geological Survey (USGS) providing support through project management, coordinating and quality control activities (QC/QA).

LAND USE DATA: Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1979. It includes public boundaries, roads, airports, geographic names and geographic places, rivers and other water are from 1979 USGS copyrighted data. Since map information is another current incomplete.

MAPS AND DIGITAL DATA: Use the CT EGP website for the map and a variety of others in PDF format. Visit the CT EGP website to download the base map digital spatial data shown on this map.
