EXPLANATION

This map displays 2012 high resolution orthophotography for the Town of Ellington. It is a natural color, leaf off, 1 foot (0.3 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other DESS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street level data such as major intersections, T-intersections, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic landmarks and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through a partnership between Connecticut Department of Emergency Services and Public Protection (CTDEPP), the Connecticut Department of Transportation (CTDOT), and the National Oceanic and Atmospheric Agency (NOAA) along with the United States Geological Survey (USGS) providing support through project management, contract administration and quality assurance/quality control (QA/QC).

BASE MAP DATA: Based on data originally from 1:24,000 scale (USGS 7.5 minute topographic quadrangle maps published between 1972 and 1992) including political boundaries, railroads, airports, geographic names and geographic places. Water and street names are from the 7.5" copyrighted data. These map information is another current and complete.

MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
