This map displays 2012 high resolution orthophotography for the Town of Groton, CT. It is a natural color, leaf-off 1 foot (0.30 meter) aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, 35+ streets, state routes, streets, railways, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and structures are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY: Aerial imagery is provided through partnership between Connecticut Department of Emergency Services and Public Protection (DEEP) and the Connecticut Department of Transportation (CDOT), and the National Oceanic and Atmospheric Administration (NOAA) along with the United States Geological Survey (USGS) providing support through project management, contract and quality assurance/quality control (QA/QC).

HARD MAP DATA: Based on data originally from 1:24,000 scale USGS 7.5 minute topographic quadrangle maps published between 1997 and 2008. Includes public dedication, railroads, airports, geographic names and geographic places. Roads and other features are from this data, copyright data. These map information is another current version complete.
