This map displays 2012 high-resolution orthophotography for the State of Connecticut. It is a natural color, leaf off, 1 foot (0.30 meter) scale aerial survey taken in the Spring of 2012. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street level data such as major intersections, ES meters, state routes, streets, railways, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, town stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Aerial imagery is provided through partnerships between Connecticut Department of Emergency Services and Public Protection (DEEP), the Connecticut Department of Transportation (CDOT), and the National Geospatial-Intelligence Agency (NGA), along with the United States Geological Survey (USGS) providing support through project management, contracting and quality assurance. Credits for digital data wholesale are included.

DATA SOURCES - CTS Data as of 2012/03/01 with a variety of editors on PDF format. Visit the CT Cooperation website to download the free map digital special data shown on this map.
